

# Maxim Conservative Profile II

Inception Date: 9/16/1999  
Fund Manager: GW Capital Management, LLC  
For the period ending 9/30/2003

## Potential Risk/Return Meter

## Fund Operating Expenses

0.10%

## Total Net Assets

\$154.45MM

## Who is likely to choose this type of investment?

A Conservative Profile may be most appropriate for someone whose highest priority is principal security and is willing to accept lower potential return. The investor may be approaching retirement, with a short time horizon, or may prefer to take less risk than other investors. Investors choosing this option want to invest in a mixture of diverse investments suiting their needs but do not have the time, desire, or knowledge to select and manage their own portfolios.

## Investment Objective

Seeks to achieve total return consistent with preservation of capital by investing in Underlying Portfolios, with an emphasis on fixed income investments. To keep the Profile balanced and in line with its objective, we follow a three-step review process. First, we evaluate the asset class mix annually and may re-mix among asset classes to take advantage of market conditions to maintain the best-performing mix possible. Second, to maintain this asset class mix, we rebalance the Profile quarterly. Finally, we evaluate the Profile's underlying portfolios and may add better performing portfolios (of those available) and remove poor performing portfolios on a quarterly basis to keep the best performing portfolios as part of the Profile. The fund operating expense listed for the Profile investment option is in addition to the pro-rated fund operating expenses of each underlying portfolio in which they invest.
